PROFESSIONAL SUMMARY

Penetration Tester with hands-on experience in Vulnerability Assessment and Penetration Testing (VAPT) across web applications, mobile apps, APIs, network, and Windows infrastructure. Experienced in delivering CERT-In empanelment audits and government security assessments aligned with OWASP Top 10 standards. Skilled in manual validation & exploitation, PoC development, CVSS risk rating, and actionable remediation reporting. Led a 2-person security team for the Labour Department, managing stakeholder communications and developer remediation.

CORE TECHNICAL SKILLS

- **Testing Domains:** Web, Mobile & API Penetration Testing, Windows & Linux Infrastructure Security, Internal Network Reconnaissance
- **Security Tools:** Burp Suite, Postman, Nmap, Nessus, OWASP ZAP, Metasploit, Hydra, SQLmap, JADX, Frida, MobSF, APKTool, enum4linux, Wireshark, Nikto
- **Standards & Frameworks:** OWASP Top 10 (Web/API/Mobile), CVSS v3.1 / v4.0, MITRE ATT&CK, NIST SP, CERT-In Audit Guidelines
- **Scripting & Platforms:** Python, Bash, PowerShell, SQL, Kali Linux, Windows Server, Git
- **Core Concepts:** TCP/IP & OSI Models, HTTP/S, DNS, SSL/TLS, SMB, Authentication & Session Management

PROFESSIONAL EXPERIENCE

Innometrix Techub Pvt Ltd. — Salem, Tamil Nadu

Penetration Tester — June 2024 – Present

- Executed end-to-end VAPT across web, APIs, mobile, network, and Windows environments handling reconnaissance, attack-surface mapping, vulnerability identification, manual exploitation, PoC development, risk assessment, remediation reporting, and retesting.
- Conducted static and dynamic security assessments (SAST/DAST) on Android applications, bypassing SSL certificate pinning and root detection using Frida/Objection, analyzing source code with JADX/APKTool, and intercepting API traffic using Burp Suite.
- Performed web and API penetration testing targeting broken authentication, authorization flaws (BOLA/BFLA), session management, input validation, and business logic bugs using Burp Suite.
- Audited a Windows infrastructure testbed for a CERT-In empanelment evaluation, exploiting SMBGhost (SMBv3.1.1) via Metasploit to obtain a SYSTEM shell and assessing SMB configurations with Nmap and enum4linux.
- Conducted a CERT-In empanelment audit on a Roundcube email server, weaponizing a PHP object deserialization flaw via Metasploit to capture a reverse shell, while testing SMTP open relays, email spoofing, and IMAP cleartext logins.
- Led a 2-person VAPT team for the Tamil Nadu Government Labour Department ISM portal under a Project Management Unit (PMU) engagement, identifying and reporting security vulnerabilities. Managed client communication and stakeholder reporting to Commissioner and Assistant Commissioner-level officials, and guided developers through remediation.

CERTIFICATIONS & TRAINING

- **Certified AppSec Practitioner (CAP)** — with Merit — The SecOps Group
- **Certified Penetration Testing** — CyberNerds Solutions (2025)
- **Certified Malware Analyst in Windows** — K7 Academy
- **Continuous Security Labs** : Simulated and exploited real-world vulnerabilities across PortSwigger Academy, TryHackMe, OWASP BWA, and PentesterLab.

EDUCATION

B.E. in Electronics & Communication Engineering — Sri Shanmugha College of Engineering and Technology, Salem
Duration: 2020 – 2024 | CGPA: 8.5 / 10
